

SWISS TECHNOLOGY

# 2055D Air Washer

Advanced Digital Technology.

Humidification and cleaning (2in1).

No filters or additives required.

Extremely quiet operation.

Antimicrobial protection  
system. (ISS)

Ideal for allergy sufferers.

# 2055D Air Washer

SWISS TECHNOLOGY

## Advanced Digital Technology

Digitally control humidity levels with the programmable hygrosat. Set humidity levels from 30% to 70% or for continuous use. Other digital features include a hygrometer, automatic shut-off, cleaning indicator and Ionic Silver Stick exchange reminder.

## Humidification and cleaning (2 in 1)

The Air Washer cleans and humidifies the air in the self-regulating process of evaporation by using special humidifier discs. These discs have a great adhesion for water to guarantee high humidity output.

## No filters or additives required

The special bionic humidifier discs with scoop ribs for optimal humidification never need replacing. The Air Washer removes impurities such as dust, pollen and particle-bound odors from the air naturally, without the use of chemical additives.

## Extremely quiet operation

The Air Washer offers two power modes for normal and night operation. This allows for either power operation or ultra silent night mode (equivalent to the sound of a sleeping baby).

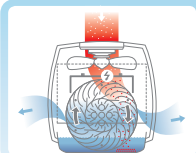

## Anti-microbial protection system (ISS)

The unit is equipped with the Ionic Silver Stick (ISS). The ISS utilizes the anti-microbial property of silver and provides up to a year's worth of optimal water quality maintenance in all AIR-O-SWISS and BONECO humidifiers. The ISS works even when the humidifier is switched off.

## Ideal for allergy sufferers

Permanent, self-rinsing humidifier discs turn through the water cleaning airborne particles captured by the discs, like fresh rain cleans outdoor air – naturally (ideal for allergy sufferers).

## Air Washer System

Dirty, dry air enters a BONECO Air Washer and clean, healthy air is emitted throughout your room. This 2 in 1 Humidifier and Purifier is equipped with permanent humidification discs with no filters that require replacement. Due to its cleaning function and self-regulating humidification it is suitable for operation throughout the whole year.

## Technical data

Electrical voltage	230V/50Hz	Dimensions (mm)	360x360x360
Power consumption	24W	Weight (empty)	5.9kg
Humidity output up to	300g/h	Operating noise	< 25dB(A)
Suitable for room sizes	50m <sup>2</sup> /125m <sup>3</sup>	Accessories	Ionic Silver Stick® (ISS)
Water capacity	7.0 Liter
