

"WE ARE DRIVEN BY THE
INSPIRING MOMENT
WHEN PRECISE SOLUTIONS
ARE IDENTIFIED."

ALEXANDER GAPP, CEO PLASTON AG

LOOKING BACK

CONQUERING THE WORLD FROM A GARAGE

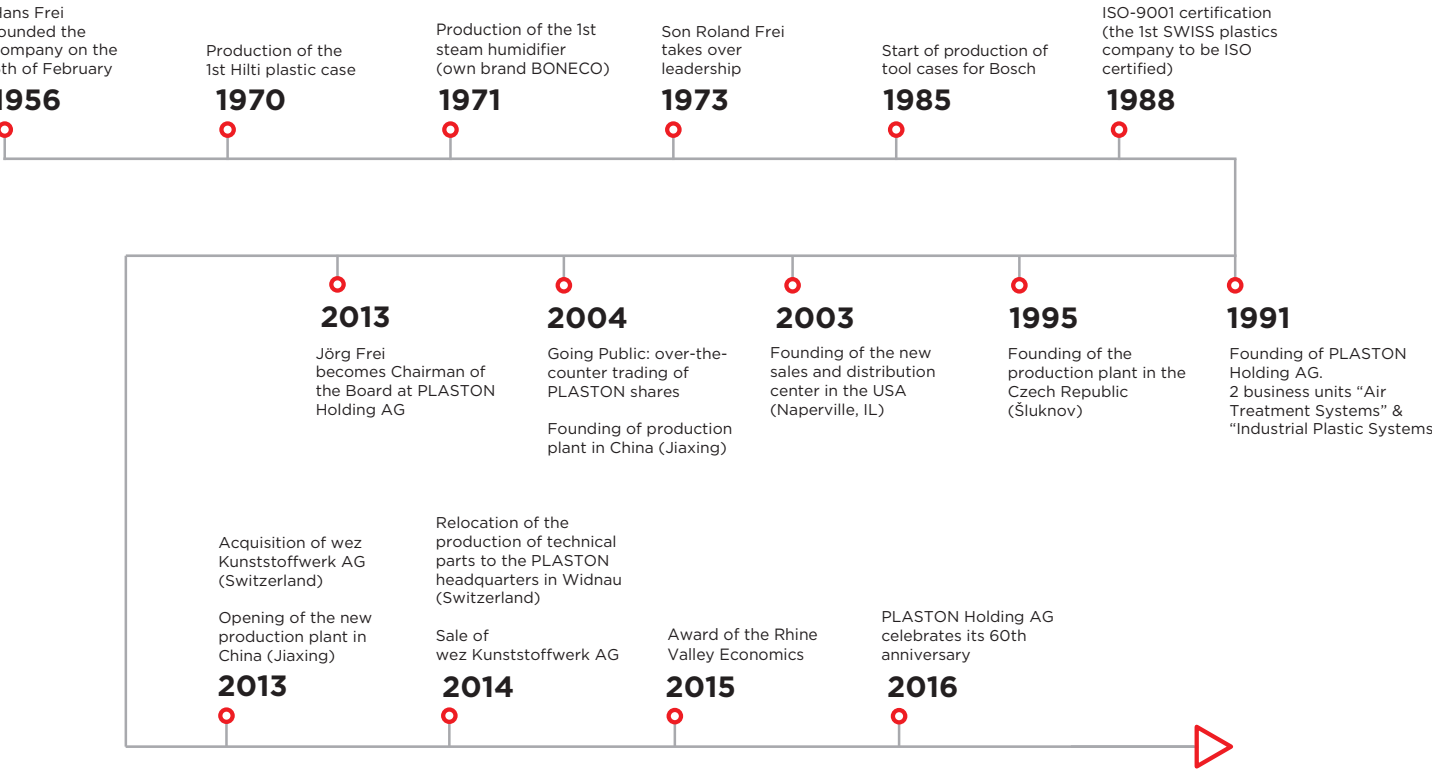

COMPANY PROFILE

PLASTON's history started on the 6th of February 1956. The founder, Hans Frei made his first plastic product with his son Roland in his parent's house in Widnau, in the Swiss Rhine Valley. They made products for the household sector and regional industry, maintaining their independence - even in times of economic uncertainty, this worked extremely well for them.

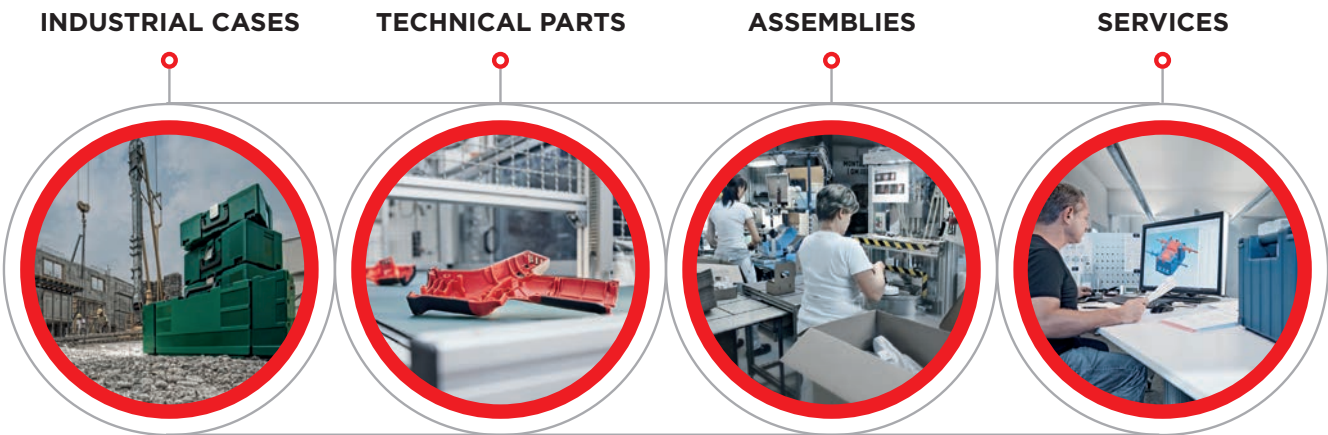

From a two-man operation founded in the middle of the last century, there grew an international player. And PLASTON is still growing.

FOUR PRODUCT FIELDS

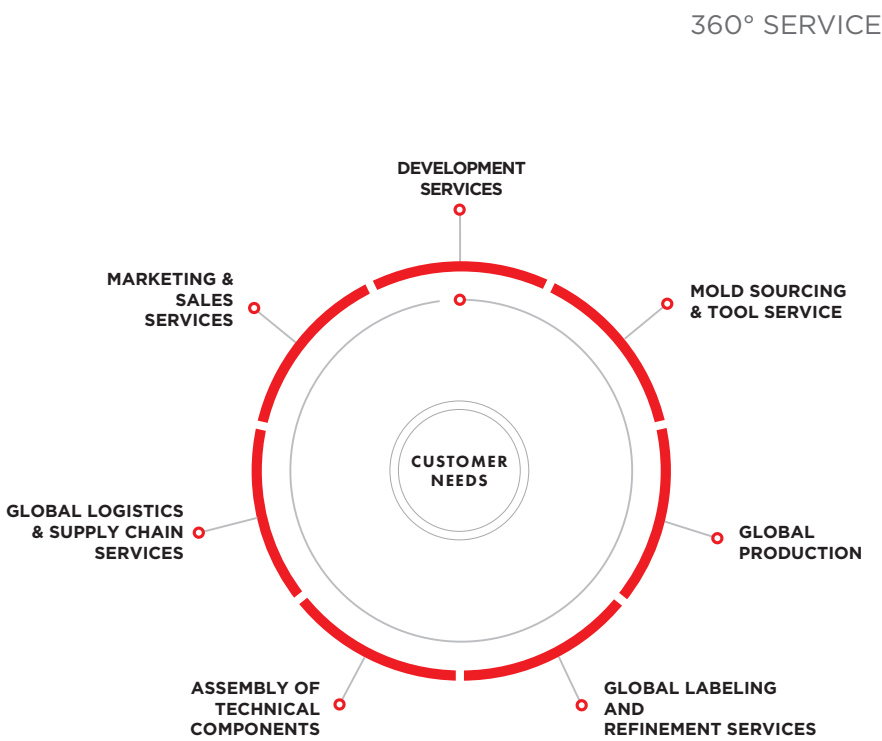

PLASTON is the leading global provider of high-quality plastic packaging solutions. The company, with its headquarters in the Swiss town of Widnau, also produces technical plastic trim parts for equipment and machine housing, and assembles the elements to make components and finished products ready for sale. PLASTON's Service division follows every product throughout its entire value chain, from development through to production and logistics.

PLASTON understands its customers and takes on the role of an innovation partner.

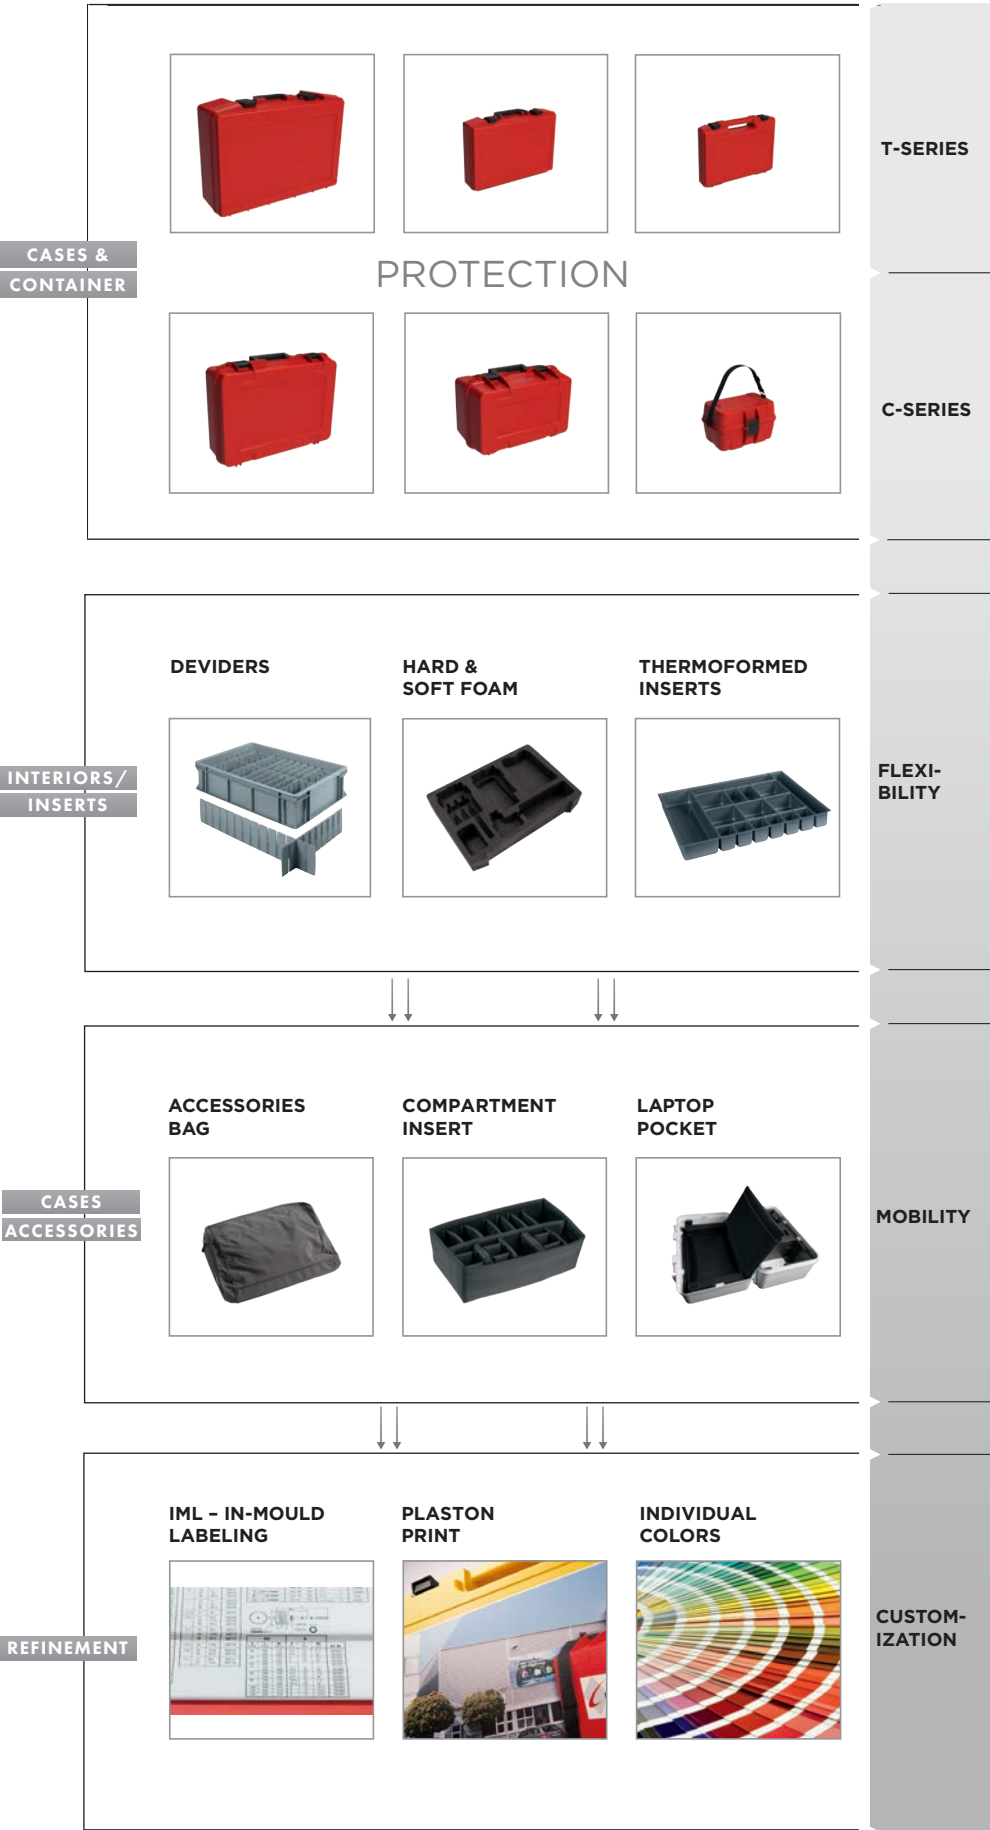

KNOW-HOW & INDIVIDUAL SOLUTIONS

The best plastic product or the best industrial case can only be as good as the service that goes with it. That is why PLASTON places so much importance on providing comprehensive care. The service is based on personal communication and the electronic exchange of data. It covers the entire value added cycle from development and production to logistics. It is founded on the professional understanding of the customer's needs and concerns. This all-round service shapes the way the personnel at PLASTON think and act.

THE PRINCIPLE OF MODULAR DESIGN

At first glance, it looks like a case, maybe a storage box. Nothing more, nothing less. But upon closer inspection you can see all the clever details that make the PLASTON products so unique. Numerous features and additions turn simple cases into tailor-made solutions to meet the needs of customers, whilst also strengthening their brand.

AT HOME IN SO MANY SECTORS

Whether for construction sites across the world, for highly sensitive medical or the hygiene-related food industry applications, PLASTON is prepared for the requirements across all industrial boundaries and thus provide time and time again inspiring ideas and solutions in plastic.
